Pocket thermostats

Summary

Thermostats for monitoring, control or limitation of temperature of liquid media in HVAC installations and in machinery constructions.

Applications

- HVAC systems – temperature controls, safety circuits etc.

Functions

Temperature changes over the limit influence a change-over or NC contact which is available at the terminals. Setpoint knob to set the switching temperature can be set manually.

Technical data

Switching capacity	10 (1.5)A, 24...250 V AC
Contact	dust protected contact block, single or double potential-free changeover contact
Cover	ABS, reinforced with glass fiber
Ambient temperature	-10...65°C
Pocket	G1/2", brass; stainless steel as option
Immersion length	120mm, on demand 200mm
Protection	IP54 / IP65
Tests	TÜV, DIN 3440 (STB 112299, TR 110497, TR/STB 112199)
Function	
TR * (controller)	at temperature above the preset value: contacts 2-3 open.
STB/STW * (safety limiter / indicator)	at temperature above the preset value: contacts 2-1 open. They close again after cooling down by about 15...20K and pressing of the reset button

Types

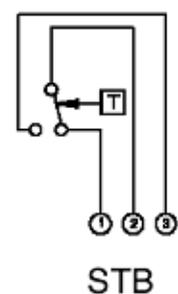

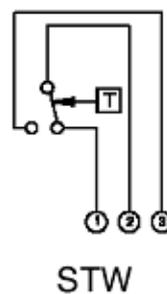

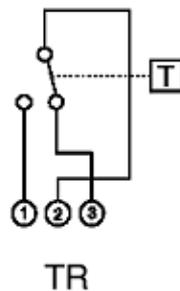

The thermostats are delivered with different functions and temperature ranges:

Type	Range 1 (°C)	Range 2 (°C)	Hysteresis 1 (K)	Hysteresis 2 (K)	Max. temperature	Function	IP	Cert.

TR* temperature controller
 TW* temperature indicator
 STB* safety temperature limiter

Terminals

1-step:

2-step:

* All functions as in EN 14597, Temperature control devices and temperature limiters for heat generating systems.

Internal settings

The ..U types have internal setpoint settings available after removing the cover.
