SCADA

Web SCADA, management station

Large management stations as well as local **web-based SCADA**. Data aggregation from PLCs: online values and long-term data storage in databases. Web access for simple maintenance and licensing. **State-of-the-art visualisation** of floor plans, schemas, tables and charts.

Authorised and trained **users may edit the schemas**. Merbon SCADA provides comprehensive **user and roles management**.

Panels with technology schemas contain animations, static images, texts, user notes, setters, references, etc. The layout is completely customizable.

Trend data analysis (line, bar, modulo, difference, and carpet plots). Fast evaluation of problems and instant overview of the technologies. **Data export and sharing** (html links, images, tables, or text).
